Definition: Cluster computing is the technique of linking two or more computers into a network (usually through a local area network) in order to take advantage of the parallel processing power of those computers. An eternal struggle in any IT department is in finding a method to squeeze the maximum processing power out of a limited budget. Today more than ever, enterprises require enormous ...

What is a computer cluster / cluster computing?

4. See, e.g., The definition of “remote computing service” in 18 U.S.C. Â§ 2711(2) (the provision to the public of computer storage or processing services by means of electronic communications systems). As Professor Orin Kerr explains, the statute “freez[es] into law the
