In article number 1706913, Ali Khademhosseini, Yu Shrike Zhang, and co-workers report a multichannel coaxial extrusion system for microfluidic bioprinting of circumferentially multilayered cannular tissues in a single step, which allows these perfusable cannular constructs to be tuned continuously between monolayers and multiple layers at regular intervals across the length of a bioprinted tube.

Herein the state of the art of quantum dot composite materials is described, with particular interest paid to light emitting and guiding technologies. Great attention is paid to micropatterning, focusing on the importance of surface chemistry and ligand engineering, host matrixes, and wet processing to achieve optimal photostability, aggregation, and phase separation of quantum dots in ...

Thermoelectric materials show the thermoelectric effect in a strong or convenient form.. The thermoelectric effect refers to phenomena by which either a temperature difference creates an electric potential or an electric potential creates a temperature difference. These phenomena are known more specifically as the Seebeck effect (converting temperature to current), Peltier effect (converting ...

A barcode (also bar code) is an optical, machine-readable, representation of data; the data usually describes something about the object that carries the barcode. Traditional barcodes systematically represent data by varying the widths and spacings of parallel lines, and may be referred to as linear or one-dimensional (1D).
