A false memory is a psychological phenomenon where a person recalls something that did not happen or differently from the way it happened. There is a growing body of evidence that false memories are created whenever memories are recalled. False memory is often considered for trauma victims including those of childhood sexual abuse. This phenomenon was initially investigated by psychological ...

Repressed memories are memories that have been unconsciously blocked due to the memory being associated with a high level of stress or trauma. The theory postulates that even though the individual cannot recall the memory, it may still be affecting them subconsciously, and that these memories can emerge later into the consciousness. Ideas on repressed memory hiding trauma from awareness were ...
