Assessing decision-making capacity in older individuals with dementia, now known as major neurocognitive disorder (MND), is a complex and challenging endeavor. There is a dearth of literature that touches on the sensitive and controversial topic of sexuality in institutionalized settings, despite the rapid increase in the global population of older individuals.

Advertising is a pervasive influence on children and adolescents. Young people view more than 40 000 ads per year on television alone and increasingly are being exposed to advertising on the Internet, in magazines, and in schools. This exposure may contribute significantly to childhood and adolescent obesity, poor nutrition, and cigarette and alcohol use.
