Center for Modeling of Turbulence and Transition: Research

Modeling of Turbulence and Transition where $C_1 = 3.4$. This is a quadratic model in the Reynolds-stress tensor. It satisfies what is called the weak realizability condition.

Modeling of Turbulence and Transition - NASA

The second way to predict transition is to use low Reynolds number turbulence models. However, the ability of these turbulent models to predict transition is questionable.

(Disc 7) A Selective Review of Transition Modelling for CFD

The modeling strategy provided includes meshing optimization, solver settings, comparison between different turbulence models and, mainly, the calibration of the local correlation parameters of ...
