select article Twenty-five years of progress, problems, and conflicting evidence in econometric forecasting. What about the next 25 years?

International Journal of Forecasting | Twenty five years

5 Twenty-five years ago, high-performance computing (HPC) in the United States stood at a crossroads. Established computing architectures were approaching their limits in performance and competitiveness, while the country's need for computing power to solve challenging problems in science, energy, and national security continued to grow.
