parts of the world. The first electric bikes similar to current models were produced in the 1990s. By the first decade of the 21st century the e-bike market in China began to grow at an exponential rate. The demand for e-bikes in Europe and North America began to grow somewhat later than in China but is now a multi-billion dollar market.

## **The Global E-bike Market - INSG**

China has increased its lead in electric-vehicle (EV) production, according to new McKinsey research (Exhibit 1). Chinese OEMs produced 43 percent of the 873,000 EVs built worldwide in 2016. And the country now has the largest fleet of EVs on the road, overtaking the US market for the first time (see sidebar, "Our methodology").
