A First Course in Linear Algebra is an introductory textbook designed for university sophomores and juniors. Typically such a student will have taken calculus, but this is not a prerequisite. The book begins with systems of linear equations, then covers matrix algebra, before taking up finite-dimensional vector spaces in full generality.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Stock market cycles are the long-term price patterns of stock markets and are often associated with general business cycles. They are key to technical analysis where the approach to investing is based on cycles or repeating price patterns.. The efficacy of the predictive nature of these cycles is controversial and some of these cycles have been quantitatively examined for statistical significance.
