In the mathematical field of complex analysis, contour integration is a method of evaluating certain integrals along paths in the complex plane.. Contour integration is closely related to the calculus of residues, a method of complex analysis.. One use for contour integrals is the evaluation of integrals along the real line that are not readily found by using only real variable methods.

The direct effect of CO₂ is only 1.2C. The IPCC estimates that carbon dioxide's direct effect is 1.2 °C 1 of warming (that is, before feedbacks are taken into account) for each doubling of the carbon dioxide level. Models amplify that warming with assumptions about positive feedback (see the blue region of model estimates in the graph below). But observations show that net feedback is ...
